

## Toby is looking for a loving home

Toby's story goes something like this: As a stray puppy his foot was badly injured by kids throwing stones at him. His leg was not healing and some workers tried to help and took part of his leg off.

For a long time after Toby suffered with a badly infected leg (Picture right) and struggled to walk properly. He was very skinny and in poor condition. Luckily for Toby, he was looked after by kind Indian workers.

Having spotted Toby on the streets I took Toby to the vet to have him properly treated. After a long operation his leg was amputated and his health has since considerably improved. Toby is putting on weight and is much brighter.

The workers cannot take care of Toby anymore as their construction site has moved and they are not allowed to take him to their new camp. Now Toby is looking for a new beginning in a home.

Despite his ordeal Toby is a placid and gentle dog who enjoys the company and caring attention of people. Toby is happy to play and run, but grows tired

more easily than other dogs. He is a quick learner and keen to adapt to unfamiliar situations. He needs someone loving and with patience to help his transition to a new life. If you are serious about adopting and to care for Toby for life, please call 96608737 or email
